

BELT DRESSING

DESCRIPTION

BELT DRESSING has a unique 360° valve which enables both sides of belts to be lubricated while machine is in motion. This ensures even distribution and helps extend belt life. BELT DRESSING will not glaze and does not attract dirt or dust. The coating prevents slippage on belts exposed to outdoor as well as indoor environmental conditions. Effective on all belts and belting materials.

CODE : ENV-1541

USAGE

NOTE: In many instances protective guards must be removed in order to apply belt dressing properly. In such cases please use extreme care to prevent accidents. Be sure to replace guards after treatment.

DIRECTIONS: Offers a 360° valve that allows spraying in upright or inverted position. Apply a little at a time to inner surface of belt while machinery is in motion. Spray, using a back and forth motion until the surface is completely wet. On most belts, the spray may be applied to the sheaves, pulleys or directly onto the belt itself. Repeat occasionally to maintain full power and to optimize belt life.

APPLICATIONS

Use on 'V', flat or round belts made of leather, rubber, fabric or synthetic material.

PACKAGING

AVAILABLE IN:

340g/12oz.

12 per case

SPECIFICATIONS

Physical Form	Aerosol
Colour	N/A
Odour	N/A
pH	N/A
Flammability	Highly flammable liquid and vapour

PROGRESSIVE CHEMISTRY
